Description :

Prsentation de l'diteurIn this eBook an experienced Montessori teacher shows parents how to use a clear sequence of activities to teach their 3-5 year old children about mathematics; or to help their 6-7 year olds who are struggling with math to succeed. Most activities use common items. Recommendations are also given for affordable hands-on math learning materials, and for the very best ipad math apps for young children. A link is included to a free collection of math printables for use with many of the activities. Ideas

on helping children learn are followed by activities to develop pre-math skills, and then amounts and numerals into the thousands, the Decimal System, operations with numbers, fractions, solid and plane geometric shapes, and many activities for using math skills in everyday life. Most children naturally develop an increased interest in numbers and language at around 3-5 years of age. This book shows you how to make the most of this sensitive period to give your child a firm foundation of math skills, and a positive, confident attitude toward number work that will carry on throughout the school years. There is no need for children to dislike math! Starting early with these fun, simple activities, you can send your child to kindergarten or first grade already doing math at a second to fourth grade level, setting the stage for early and continued success. If your child is having problems with math in kindergarten through second grade, these activities can save the day and turn math from a struggle to success!

Biographie de l'auteur John Bowman's most rewarding career was spent as a Montessori preschool Teacher and Director. He started three new Montessori schools for 3-6 year olds, and was the first Director of the Garfield Montessori School in Denver, CO. His goals now are to encourage parents to do early learning activities with their children and to show them how.
